## EDUCATION

<b>VIT Bhopal University</b> <i>Bachelor of Science in Computer Science — CGPA: 8.22</i>	<b>Expected May 2026</b> <i>Bhopal, Madhya Pradesh</i>
---	---

## EXPERIENCE

<b>SEO Intern – Trip101 Pte Ltd</b> <i>Remote</i>	<b>Sep 2025 – Present</b>
--	---------------------------

- Executed on-page and off-page SEO strategies, enhancing keyword performance, optimizing meta data, integrating schema markup, and improving site crawlability.
- Monitored performance using GA4, Google Search Console, and Ahrefs to identify growth opportunities and produce data-driven monthly SEO dashboards.
- Conducted in-depth SERP competitor analysis and backlink audits, enabling a 20% improvement in ranking stability for priority landing pages.
- Collaborated cross-functionally with editorial teams to deploy SEO best practices that drove measurable organic traffic growth.

## PROJECTS

<u>Mockerz</u> — React, Tailwind, Firebase, Vercel, Gemini API	<b>Jun 2025 – Jul 2025</b>
--	----------------------------

- Developed and deployed a real-time AI mock interview assistant generating over 50+ role-specific, difficulty-tiered questions daily using Gemini API, improving candidate preparation efficiency by 30%.
- Integrated FastAPI backend with Vapi-powered voice interface, achieving sub-200ms response latency and enabling seamless dialogue-based interview simulations.
- Implemented Firebase Authentication and Firestore for secure user management, tracking over 100 user sessions and persisting interview histories for detailed analytics dashboards.

<u>Finthrift</u> — Next.js, Tailwind, Prisma, Supabase, Arcjet	<b>Aug 2025 – Sep 2025</b>
--	----------------------------

- Built a responsive AI-powered personal finance tracker that enabled over 50 active users to track spending across 15+ categories and set budget goals, improving personal financial control.
- Designed and normalized scalable PostgreSQL database schema using Prisma ORM and implemented Supabase authentication to secure sensitive financial data for 1,000+ users.
- Incorporated Arcjet middleware for API security, reducing abuse attempts by 40% and maintaining 99.9% uptime and strict compliance with data protection standards.
